- Pictograms and Performance Levels:

Test	Insert performance level	 EN 388:2003
Abrasion resistance level 1 to 4	<b>4</b>	
Blade cut level 1 to 5	<b>2</b>	
Tear resistance level 1 to 4	<b>1</b>	
Puncture resistance levels 1 to 4	<b>1</b>	
0: indicates that the glove falls below the minimum performance level for the given individual hazard		
X: indicates that the glove has not been submitted to the test or the test method appears not to be suitable for the glove design or material		
The numbers above indicate the performance level of the gloves: 1 = lowest; 4 = highest ; 5 = highest for blade cut resistance		

- Protection limited to part of the hand: Limited to the palm area only.
- For multilayered gloves the overall classification does not necessarily reflect the performance of the outermost layer.

#### **Warning**

- Add warnings against likely problems to be encountered (if appropriate):  
High tear resistance gloves are not to be used next to moving machinery.  
This glove should not be contact with fire.
- List of substances contained in the glove which are known to cause allergies: N/A
- The levels of performance mentioned are only valid for the palm of the glove.
- The levels of performance mentioned are only valid for new gloves, not washed, nor regenerated.
- These levels of performance are obtained from the tests done according to conditions defined by the applicable standards.

#### **Care Instructions**

- Washing: Hand wash in lukewarm water.
- Storage: Keep in its original packaging, under ordinary temperature and humidity conditions and in clean, covered and ventilated premises.
